

Technology Director

Job Type: Full-Time | **Start Date:** August 2026

Job Description

Resurrection Lutheran School is seeking a Technology Director to lead and manage the school's technology program for the 2026–27 school year. This role oversees the integration of technology across all grade levels (JK–8) and supports both instructional and operational technology needs.

RLS embraces technology as a core component of student preparation, incorporating tools daily to develop skills students will rely on throughout their academic and professional lives. The Technology Director will play a key role in shaping how technology supports our Christ-centered mission.

Responsibilities

- Manage and maintain the school's technology infrastructure, devices, and software systems
- Develop and deliver technology curriculum for students in grades JK–8
- Support faculty in integrating technology effectively into classroom instruction
- Evaluate, recommend, and implement new educational technology tools and resources
- Ensure network security, device management, and data privacy compliance
- Provide technical support and training for staff
- Collaborate with administration on technology budgeting and planning
- Uphold and model the school's Christian values in all aspects of the role

Required Qualifications

- Bachelor's degree in Information Technology, Education Technology, or related field
- Experience managing educational technology in a school environment
- Strong troubleshooting and network management skills
- Demonstrated Christian faith and alignment with RLS's mission

Preferred Qualifications

- Experience teaching technology or coding to K–8 students
- Familiarity with Google Workspace for Education
- Experience with 1:1 device programs
- Background in STEM education
